DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.
2. Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. The phrase "wherein the dispersed particulates are insoluble to the liquid component absorption at temperatures" makes no sense. "Wherein the dispersed particulates are insoluble in the liquid component at temperatures" maybe?

Claim Rejections - 35 USC § 102

4. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
5. Claim 34 is rejected under 35 U.S.C. 102(e) as being anticipated by Chheang et al. 2003/0100654.
6. Chheang et al. disclose hot melt adhesive and at least partially exfoliated organophilic clay in claims 1-2. Applicants' claim is not novel.

Claim Rejections - 35 USC § 103

7. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

8. Claims 1, 2, 4-9, 12, 14, 21 and 37-39 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gerace et al. 4,900,771 or Marinow WO 02/10235, with Marinow 6,756,450 serving as its English translation, in view of Kolb et al. 6,586,483.

9. Gerace et al. teach a hot applied adhesive plastisol comprising PVC, plasticizers, polyethylene, and EVA in claim 1, copolymers in claim 2, plasticizers in claim 3, wax and stabilizers in claim 11 and waxes in column 6, lines 30-39. Marinow recites ethylene acrylic acid copolymer and ethylene-propylene-maleic anhydride copolymer with diisononyl phthalate in Example 1. For adhesives and bond materials see column 10, lines 27-39. Kolb et al. reveal foamed hot melt adhesive in claim 42. It would have been obvious to one having ordinary skill in the art, at the time the invention was made, to select applicants' ingredients from the list of equivalents listed by Gerace et al. Since the polymers described by Marinow are homologues of the ones claimed by applicants', that substitution would have been obvious also. Kolb et al. show that foaming hot melt adhesives is known.

Allowable Subject Matter

10. Claims 3, 10, 11, 13, 15-20, 45 and 46 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

11. Claims 22-28 are allowed.

Conclusion

12. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
